

Dear Sir/Madam,

I'm Disha Shetty, actively seeking full-time roles. With over three years of dedicated experience as a Full Stack Developer, I bring a wealth of expertise and versatility to the table. My professional journey began at Atos Syntel, where I had the opportunity to immerse myself in meaningful project named du-Telecom a telecom-based industry in UAE and refine my proficiency across a spectrum of technology platforms.

Proficient in Web Development:

Embarking on my journey at Atos Syntel, I've evolved into a specialist in crafting responsive Vue.js front-end applications. Leveraging Oracle as a database alongside Oracle WebCenter Sites for Content Management System, I've honed my skills in delivering tailored websites using HTML, CSS, and JavaScript. By integrating REST APIs, I enhance user experiences by seamlessly displaying backend responses, including details on existing data plans, remaining voice minutes, and additional bundles such as Amazon or Netflix subscriptions. Additionally, I adeptly design JSON for data transformation and utilize jQuery functions to efficiently call APIs.

Expertise in Back-End Development:

Beyond front-end proficiency, my expertise extends to robust back-end development employing Java, Spring Boot, and Hibernate. I've demonstrated proficiency in deploying and maintaining Java-based web applications across various stages, from development through pre-production testing to real-time production environments. Specializing in the creation of decoupled Java-based RESTful APIs, I prioritize Object-Oriented Design principles, and handle JSON and XML serialization seamlessly, including converting XML from DSL to Java.

Solution Design:

Collaborating closely with solution designers, I've contributed significantly to developing solutions tailored to telecom industry requirements across multiple domains, including Self-care, DSL integration, DSP, CRM, and more. These experiences have enriched my understanding of solution architecture and implementation within dynamic telecom environments.

I am confident that my technical skills, project experience, and leadership abilities make me a strong candidate. I am excited about the opportunity to contribute to your company's mission and collaborate with a talented team of professionals. I believe that my dedication, adaptability, and passion for technology will enable me to thrive in a dynamic work environment. Thank you for considering my application. I would appreciate the opportunity to discuss how my skills and qualifications align with the needs of your company. I have attached my resume for your review or checkout my LinkedIn profile, and I look forward to the possibility of an interview.
